

My carding SETup | Ko-Fi

In this tutorial I'll be showing you a simple setup for carding. People use a shit ton of tools and methods but I assure you a simple setup with quality tools would get you great results.

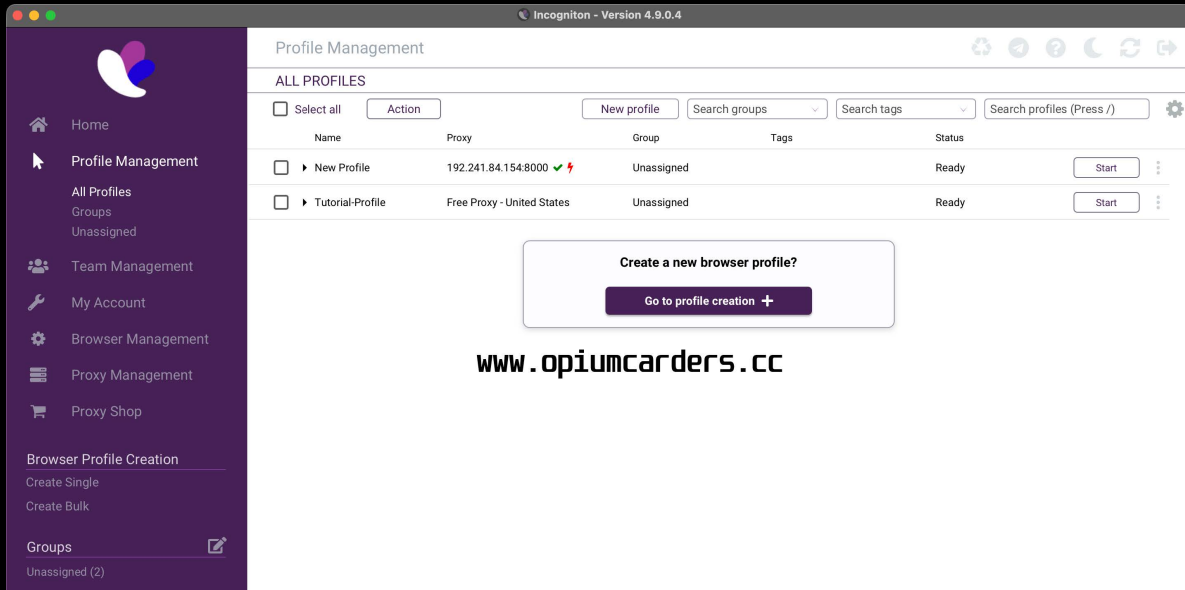

Download Incogniton Browser here <https://incogniton.com/download-incogniton/>

Other great anti detect browsers work too

When you open the browser tap on proxy and fill in your Socks info. Make sure **Connection Type** is set to Socks5 proxy. Click on **Create profile** and we are on to the next .

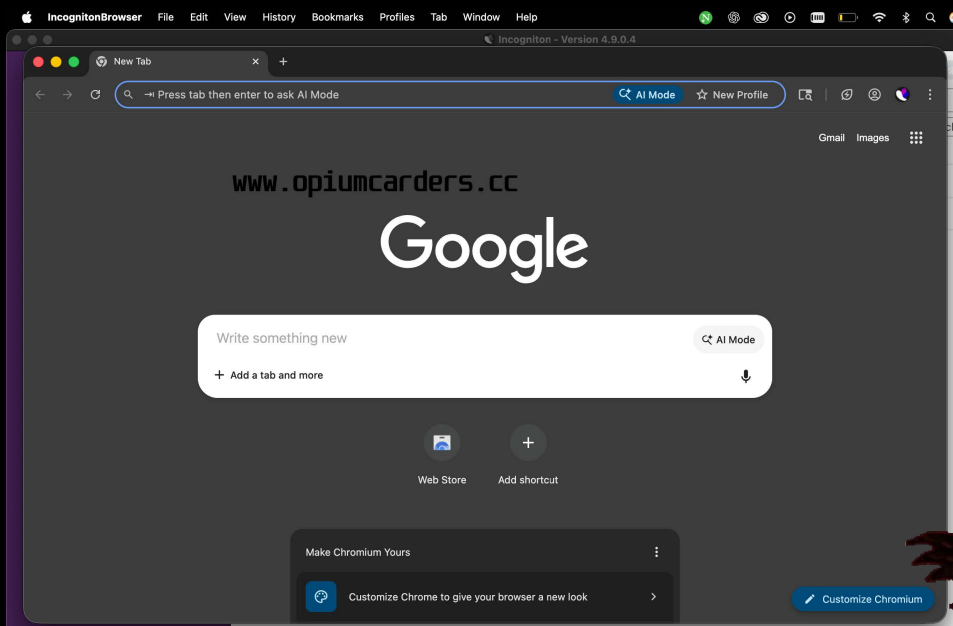

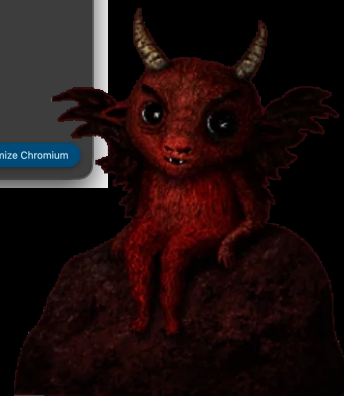

Each new profile is like a new computer. Every single carding you do should use one profile and after you are done you can delete the profile.

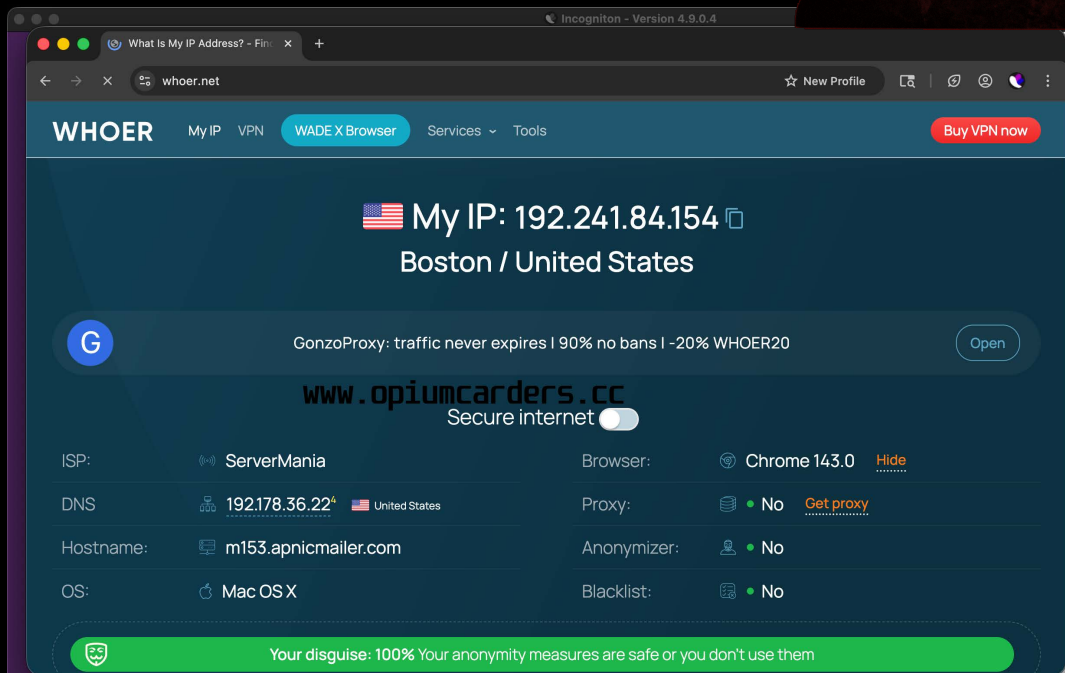

Always start a new carding operation on a new profile.

Tap on **start** and lets get started.

The browser is a Chrome based browser and looks exactly like google chrome.

Head to whoer.net and confirm if you really are on the correct socks IP you purchased. Also check that your disguise is 100% Ensuring no leaks.

For a simple carding set up thats all. We are good to go.
If you have Quality socks, Quality card and a low security site, you're good to go.

Things to note:

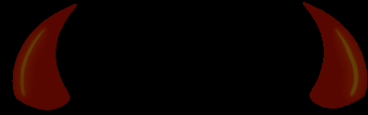

- socks must match the card's location for you to card.
- You need a good live card.
- Your browser must have no previous carding history nor cookies. In our case here we are using an anti detect browser so after carding we would delete the profile. If if you aren't using anti detect you have to remember to wipe history, cookies and is possible change user agent.

Let's try card something.....

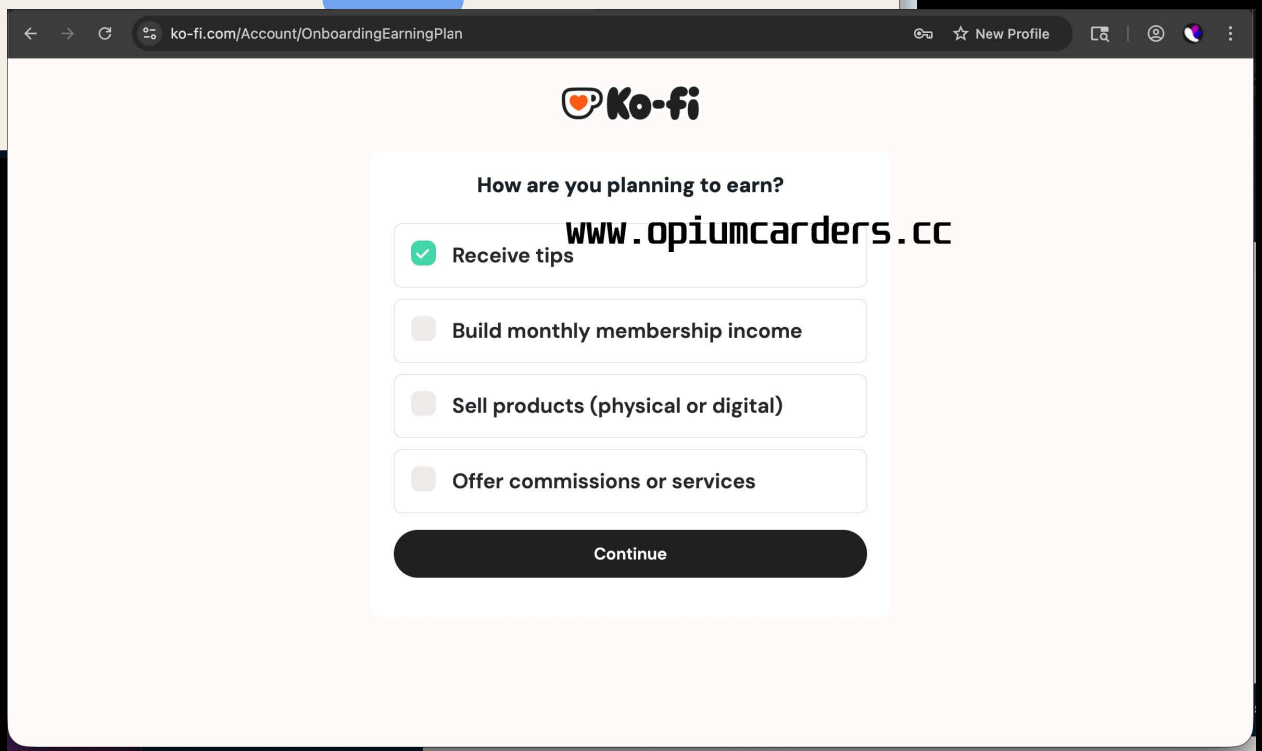

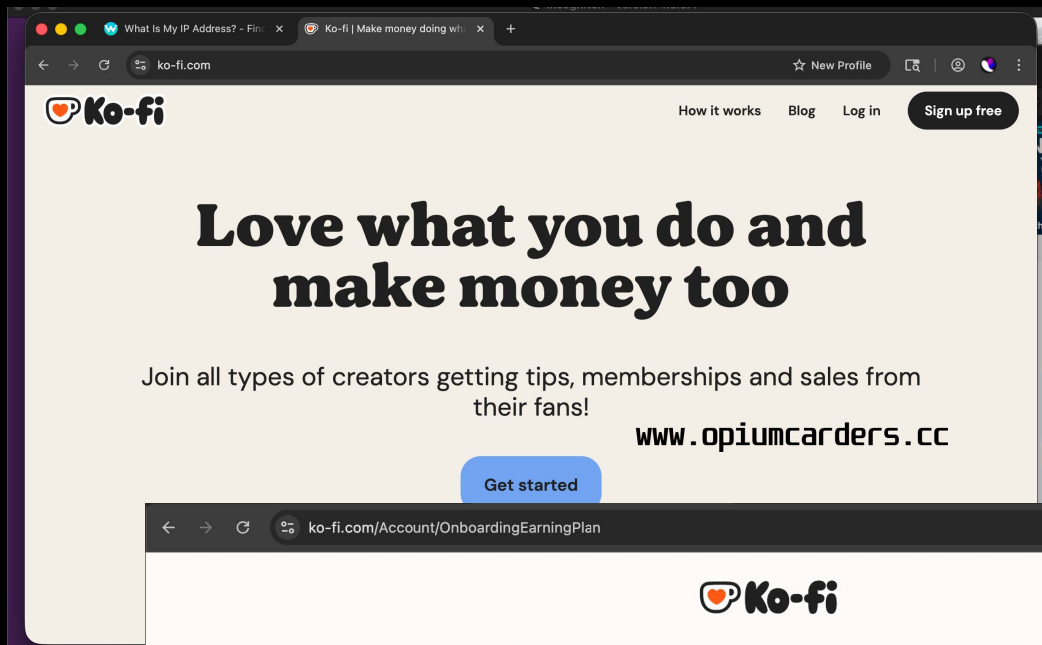

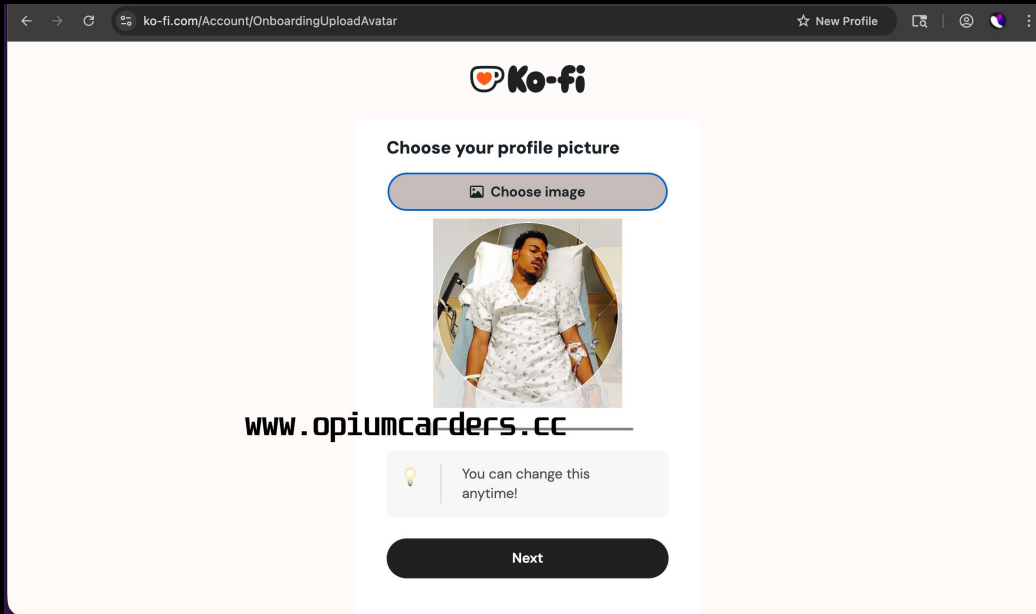

Ko-Fi.com

This is a site people use to donate any amount of money to creators and as a fake Playboi Carti, I deserve some donations.

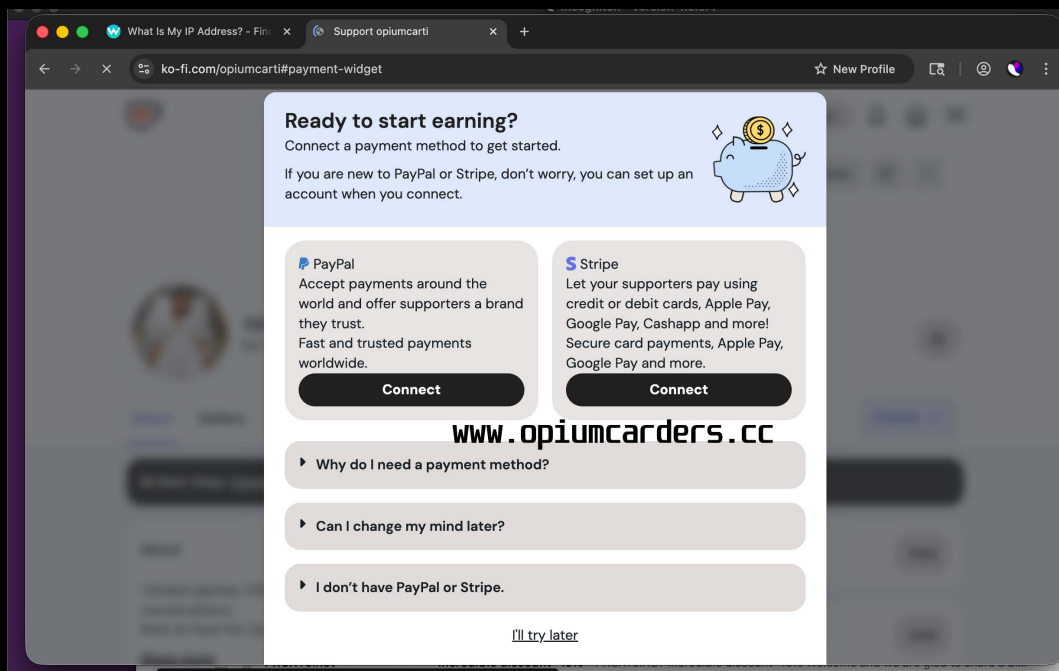

This platform uses stripe to charge cards. If you don't know about stripe you may want to check out our tutorial on carding your own website on our [website](#). There I showed how I created and used stripe.

The Setup process is pretty straight forward.

Nothing much. Most of the setting up you'll do is on stripe.

At the end of your set up, you'll be taken here.

You can use PayPal if you don't want to use stripe actually but stripe has way less security than PayPal.

What Is My IP Address? - Fin... x Stripe - Connect with Ko-fi x +

Profile Payment Page

Payment methods

Connect PayPal or Stripe to start receiving payments directly to your own account. Once connected, your fans can pay using cards, Apple Pay, Google Pay, Venmo and more! No extra setup needed.

PayPal
Accept payments around the world and offer supporters a brand they trust.
Fast and trusted payments worldwide.
Connect

Stripe
Let your supporters pay using credit or debit cards, Apple Pay, Google Pay, Cashapp and more!
Secure card payments, Apple Pay, Google Pay and more.
Connected with acmenaija@gmail.com

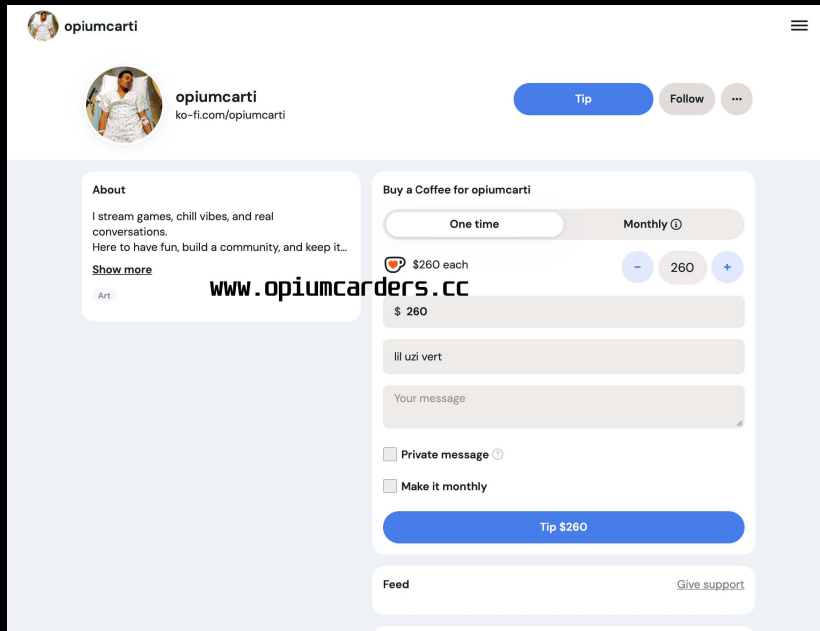

All you need to do is login your stripe account or create a new one here. To create when all that is done you can start carding your link immediately. No ID , no verification of any kind needed.

Now lets card TF out of this , well lets card \$260 bucks 🥳.....

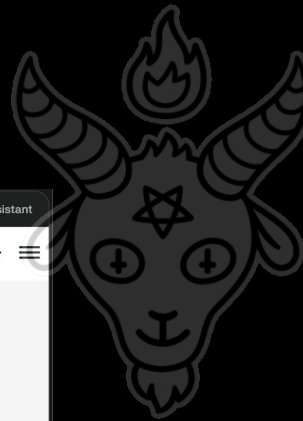

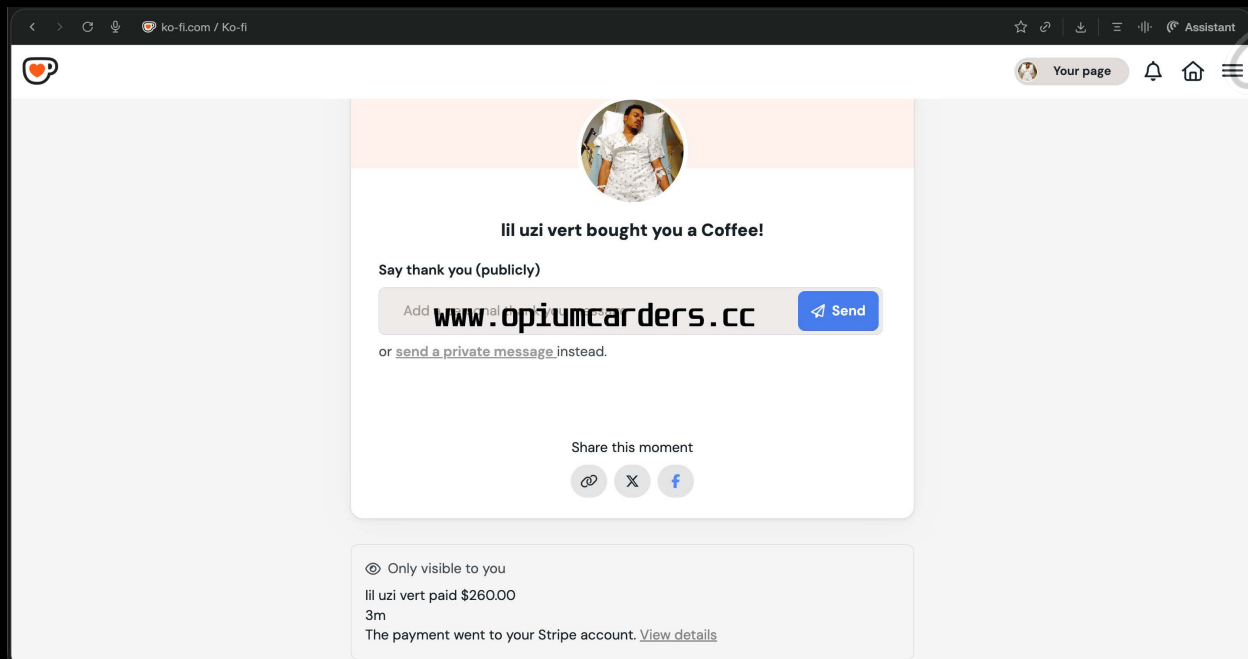

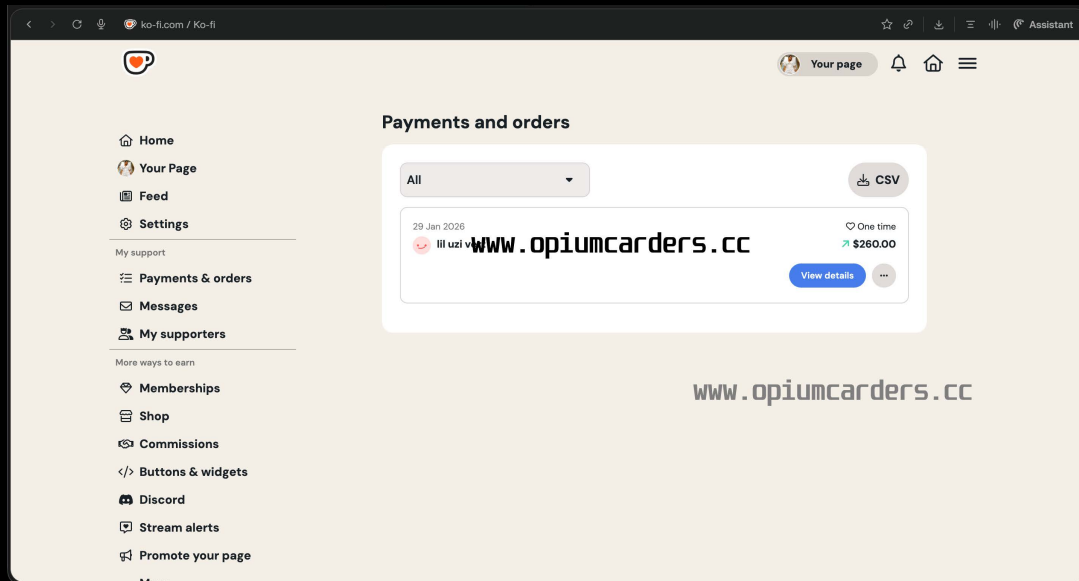

On your home page you'll find a link to your donation link. Open a different profile on incognition and pay for the item with your card.

They can donate any amount but I set my lowest at 260. My fans are awesome.

Get CC's from you trusted site or you can always go with bclub.tk

The money would be available in your account through stripe in the next 24 hrs. I recommend trying once per card.

Thats basically it. **A strong socks, A clean browser + anti detect features, and A good card.** Is all a beginner needs to get started.

If you where in my first channel you'd see I put a lot lot more into the setup but over time, doing that much started leading to transactions being flagged.

Now with carding the simpler the setup the better for you as long as you use quality tools.
