

How to Cashout Bank Log by @OpiumCarder

People asked How to cash the bank log from A to Z , from loading the Bank Drop to cashing it into cash and crypto , People stuck with how to even work with Bank Log after buying a Log , either we will cover all possibility How to Cashout Bank Log even without Email Access and Cashing it to sweet green ;)

(Links mentioned in the tutorial will only work if you have joined the channel prior , and in case the link doesn't work even after joining the channel it may be due to channel is burnt , don't worry Join the latest channel with all previous tutorials via our Website or Telegram Bot shown below)

Start the Telegram Bot , solve a captcha and get the Telegram channel verified invite links.

So starting with this you have mastered card game entering Bank Log game or have been a veteran doing it for long but now failing

Will cover topics for everyone today majorly , So there are multiple issues when getting a successful cashout from a bank log some being :

- Bank Logs without Mail Access
- Stuck with Plaid Logs
- 2FA when try to login or Transfer
- Blocking the Log due to suspicious transaction

So these issues are faced due to multiple issues cause majority of logs nowadays check

1. Cookies
2. Fingerprints
3. Age of account on the browser and history
4. IP Score
5. and much more

So people with experience even now face these issues of majorly failed transactions , and some people with No Mail Access for the OTP are stuck with Junk left

It's almost been 6 months am using this Russian python script that handles all logging in , initiating the transfer for you without flagging

(I have covered the Script in detail in previous video in detail and now they have added more major banks and CUs)

Now this solves me major stress overall and it is easy for beginners to just use this and people who can cop and start transfers with no issue

For this again am gonna use the same , and will do a transfer from a Wells Fargo log (with no Mail Access) to my Wells Drop (I have added few clean funds and it is aged not even a week)

I still use the russian version of this you can get the english version too , just enter the provided key and the proxy as directed (I have covered how to use it in detail already so go through that here I will just run the script and show the main steps)

```

Проверка истории транзакций (Fetching transaction history)...
```

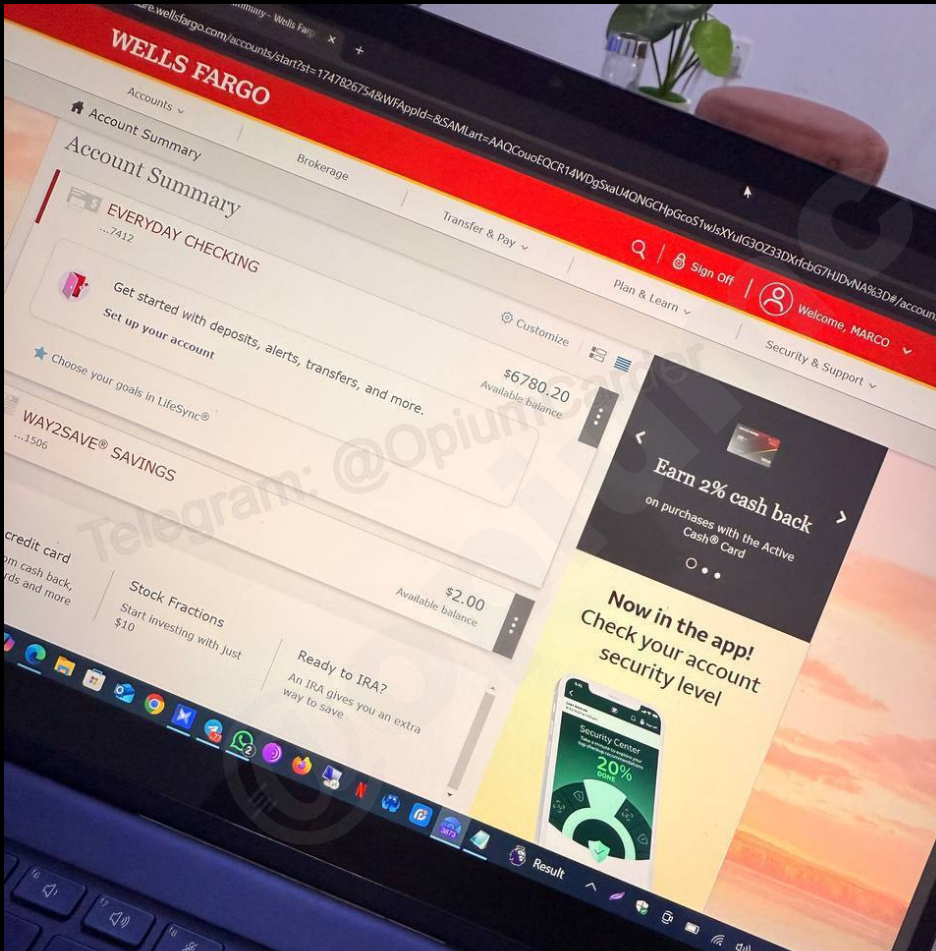

Here I put my Wells Fargo Log's (from where i need to pull from) , and the script will fetch you all the recent transactions of the bank and balance , and you can also self transfer between the accounts

(e.g Savings Account -----> Checking Account)

I am here putting the drops Account Number and Routing Number (of the drop) and the amount ;) (Here I am pulling everything from one of the guy's checking don't be greedy as me ;)

2 business days and it has reflected ;)

If you wanna buy the script , ping me on Telegram

[@OpiumKeeper](https://t.me/OpiumKeeper)

So now once in the drop there are two ways to go forward

- One you are dropping into a client's bank drop account and you can ask them to Cash it for you , or verify a crypto website and pull the amount (How to get Drop ? I have covered sugar daddy tutorial which is the easiest way to get chicks do this for you)
- But another side is you have done an openup and have nothing else than a Online Login , now will teach you how to cash , in this situation

Vr#li# | rx#duh#lq#wk#iluv#f dvh#/#lw#lv#f r p sdudwlyh# | #hdv | #dgg#hyhq#li# | rx#kdyh# | rxu#vhoi#r shqhg#df f rxqw#/#L# z loo#
f ryhu#erwk#

L# z loo#wdfnoh#erwk#fdvhv#/#

I luvwo | #ohw*v#vd | # | rx#kdyh#r shqhg#dq#df f rxqw#dgg# | rx#qhhg#to get it verified , mostly what i do is just

straight go to coinbase

So here there comes two possibilities :

1. If your client (whom the drop belongs to can verify the Coinbase for you)
2. If you have self opened up a drop (Then you need to have the DL Image , SSN , and DOB

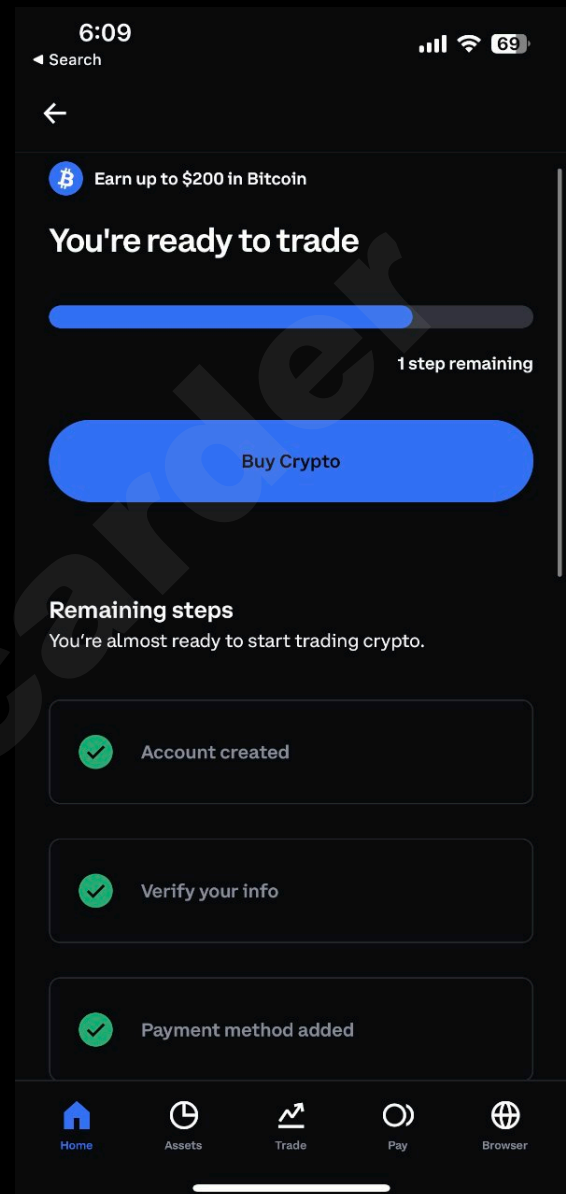

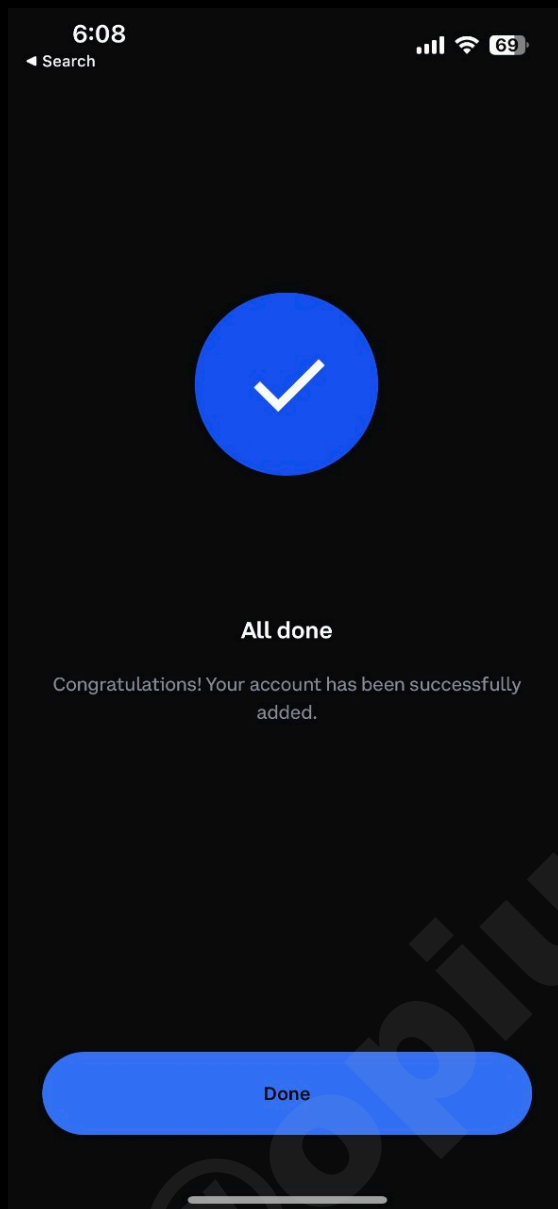

In case you don't have the DL , you can use scanlab.cc for the DL and ping me on Telegram for latest working SSN and DL Lookup bot as they get banned time to time , i will assist you with the working at current time for FREE

@OpiumKeeper (Telegram)

I have already covered verifying accounts with the FaceSwapper tool for live verification , it is available for free on our channel

Just Search " FaceSwap " on our Telegram Channel it will guide you through all the tutorials and how to use it for free to verify

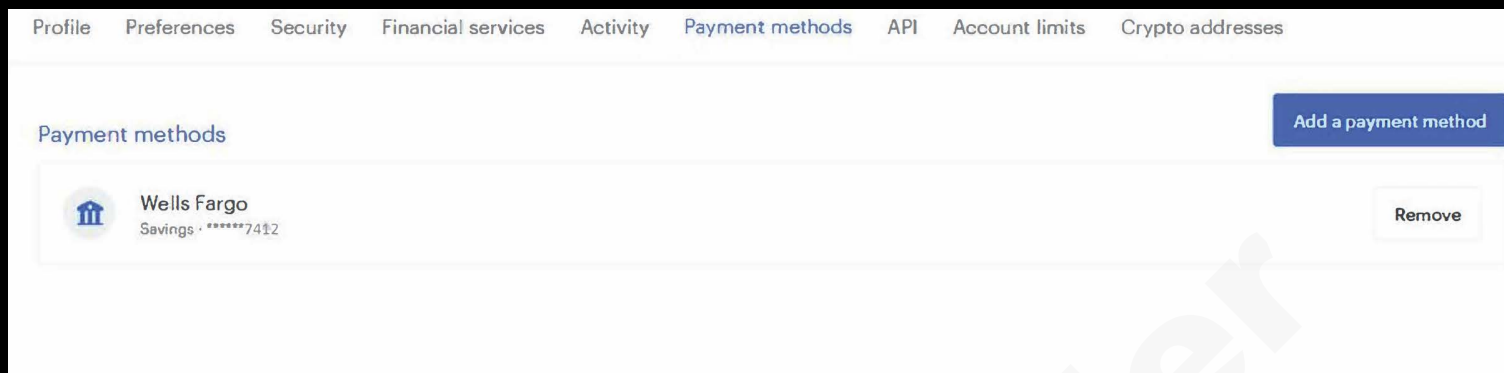

I will follow the same will verify a Coinbase and just add this bank drop Wells.

Now only thing is just going to add the bank account to the Coinbase , let's move to our PC and get this done

even here you need AN and RN of the Bank Drop

(but if you client is verifying tell him to use Plaid it is way faster)

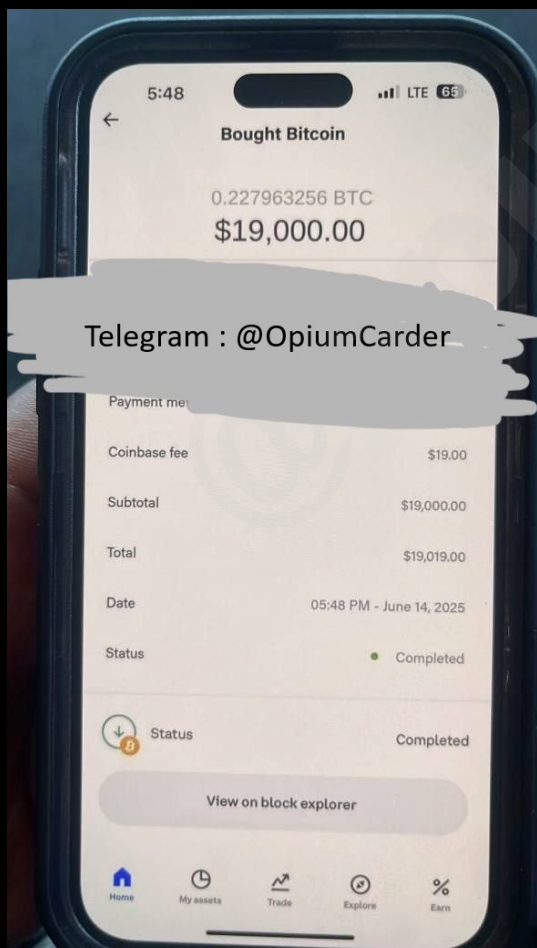

From here you can just wait 2 days after connecting (get the small deposit if you used Manual depo) name need not to mach in that case

Or if your client verified it Coinbase Name and bank Name should match ;)

From here it is easy cashout and pull

Pull from Script to Drop and Drop to Crypto my daily bread ;)

These have been some hits from June's way of the bread .

Now i will also teach you guys how to pull from making Checks

HOW TO CASHOUT WITH CHECKS

In checks, the body or looks of the checks don't really matter much. Especially for mobile deposit.

What matters is:

- ACCOUNT NUMBER
- ROUTING NUMBER
- CHECK NUMBER
- AMOUNT
- DATE

That's all the system cares about. The other designers shit will just make it look more legit incase anything goes left.

Nothing will go left if you follow me

First. You need a bank log with some reasonable funds. If you want to cashout 3k please don't get a 4k bank log

If you want to cashout 3k please don't get a 4k bank log , Get a 6k log or 7 , This is a trustmark Log i just purchased for this tut

Username: drcarlene

Password: Abby1Ella

Checking9018=\$14018

Checking6317=\$3294

AN:RN = 3501919018;065300279

AN:RN = 3500136317;065300279

Now when working on checks I like to make sure the log i got actually has money in it so i dont mess up the job

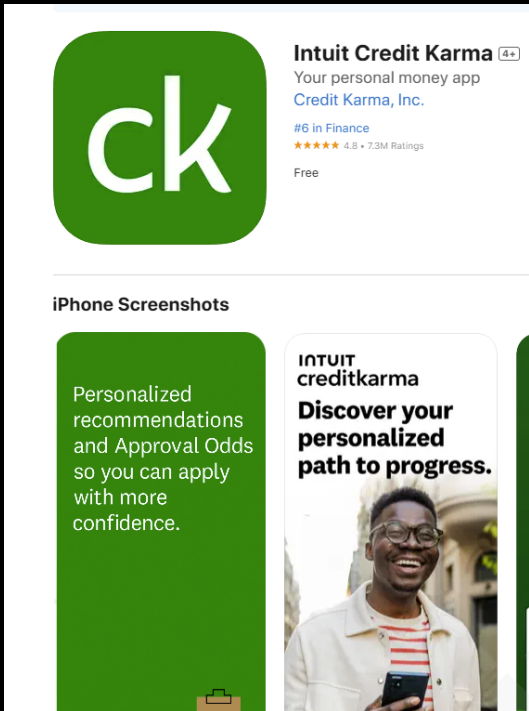

The worst shit that can happen is if you get a good bank to load and there is no money in that check.

Not only will it not work, they'll probably lock the account for suspicious activity

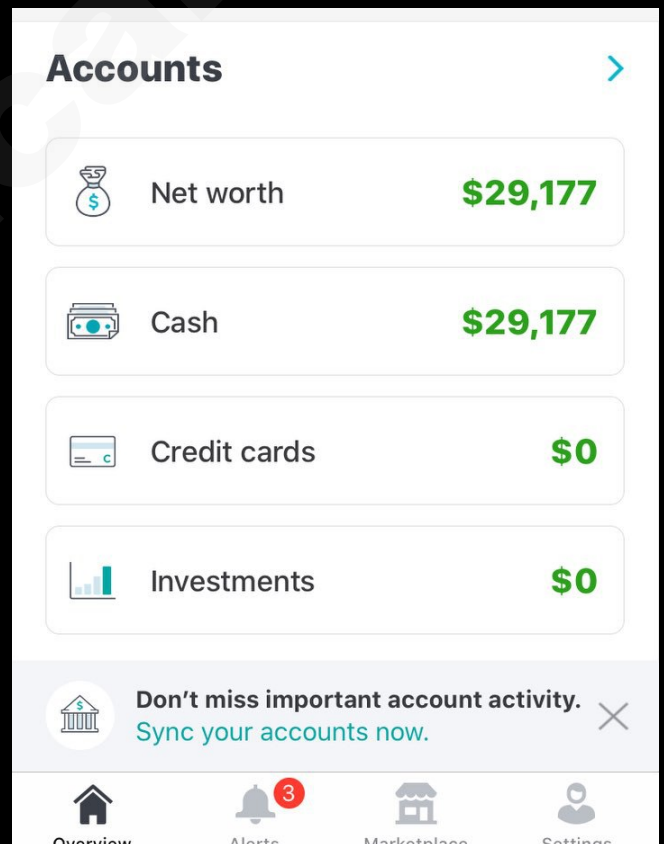

HOW TO CHECK BALANCE and CHECK NUMBER

Never ever ever login to the actual bank site , and be fool to just login using the sellers RDP , here i will just use Credit Karma App - You can only view in this not Operate like script it's the best ;)

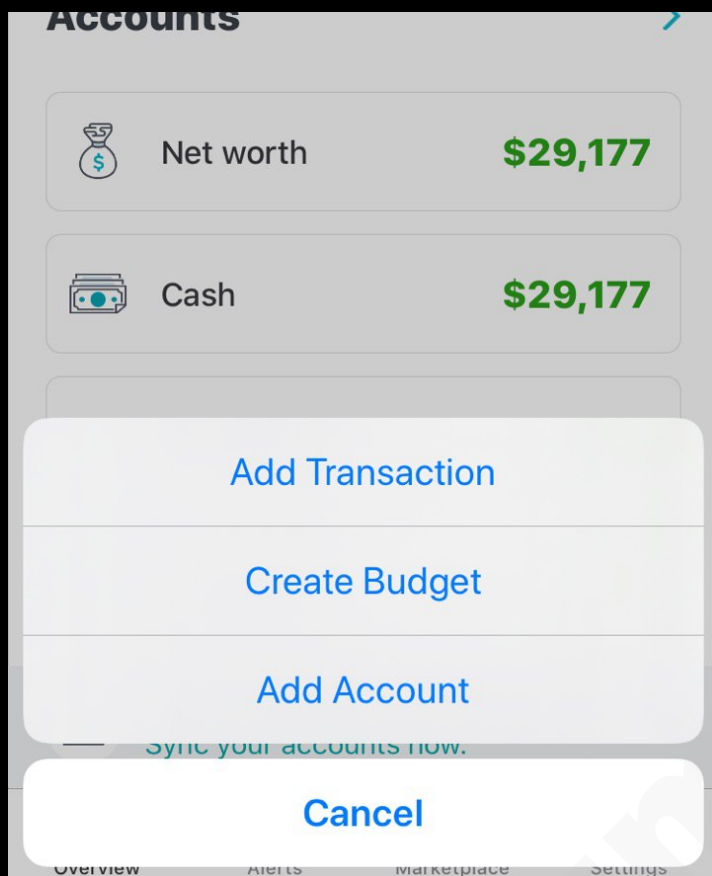

We will use this to monitor the bank log, we can also see when the money actually leaves the account and gets deposited.

Open the app and tap the “ + ” on the top corner

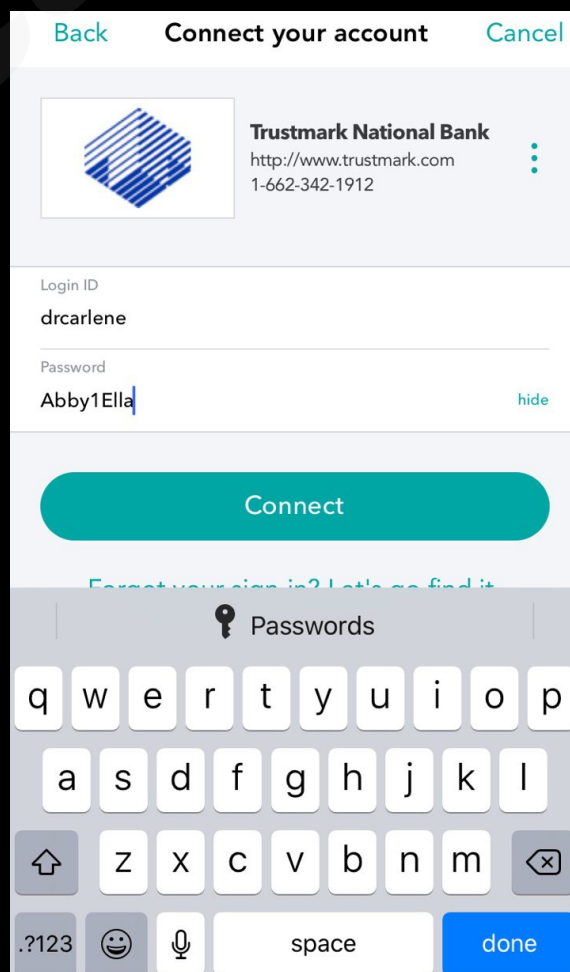

(I have sued MINT here ,same steps they jsut rebranded)

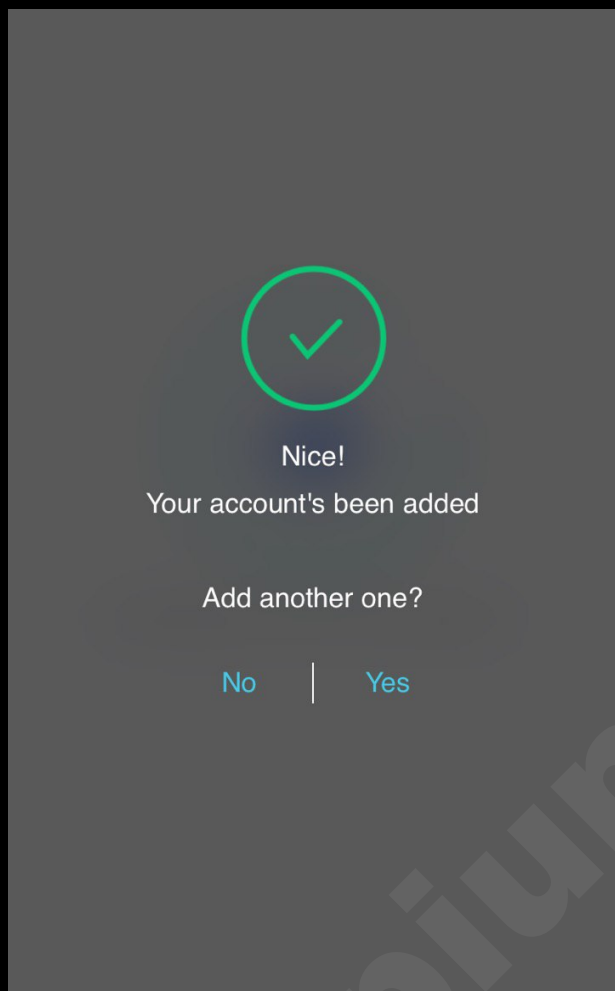

Hit "Add account " and search the name of the bank log you are using

We are using "TrustMark" here

You know what to do here, then hit connect

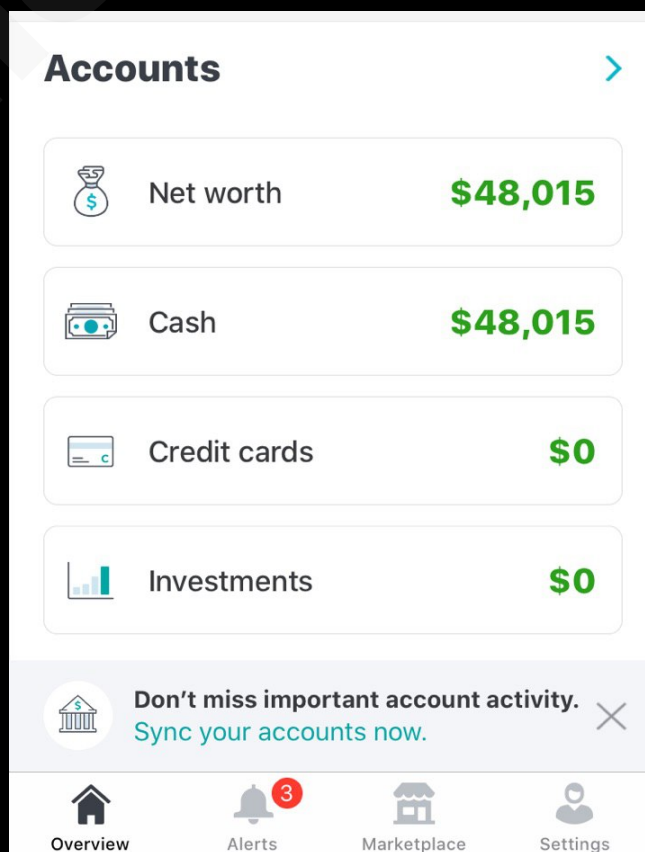

We live gang

You should see this, if not run back to your vendor or site for a refund or replacement

Where to buy Bank Logs from ?

- [@HellsFargo](#)

Now lets check the history

If you notice this person already writes checks regularly.

That's very good because we know the exact CHECK NUMBER to use . In this case it will be 128

CreditKarma is good cuz your clients cant lie and say the check didn't hit. You can clearly see it and show them

Now back to the tut

Update Help

Here you put in all your bank information from your bank log.

[I forgot to change the bank name to "Trustmark Bank"] and default date

Dont make such mistakes please

You can make up your company info. Doesn't really matter.. it just makes it look businesslike

I get real company info from BBB.org

Like so. Let the blue borders there show (that's important for some reason I don't know)

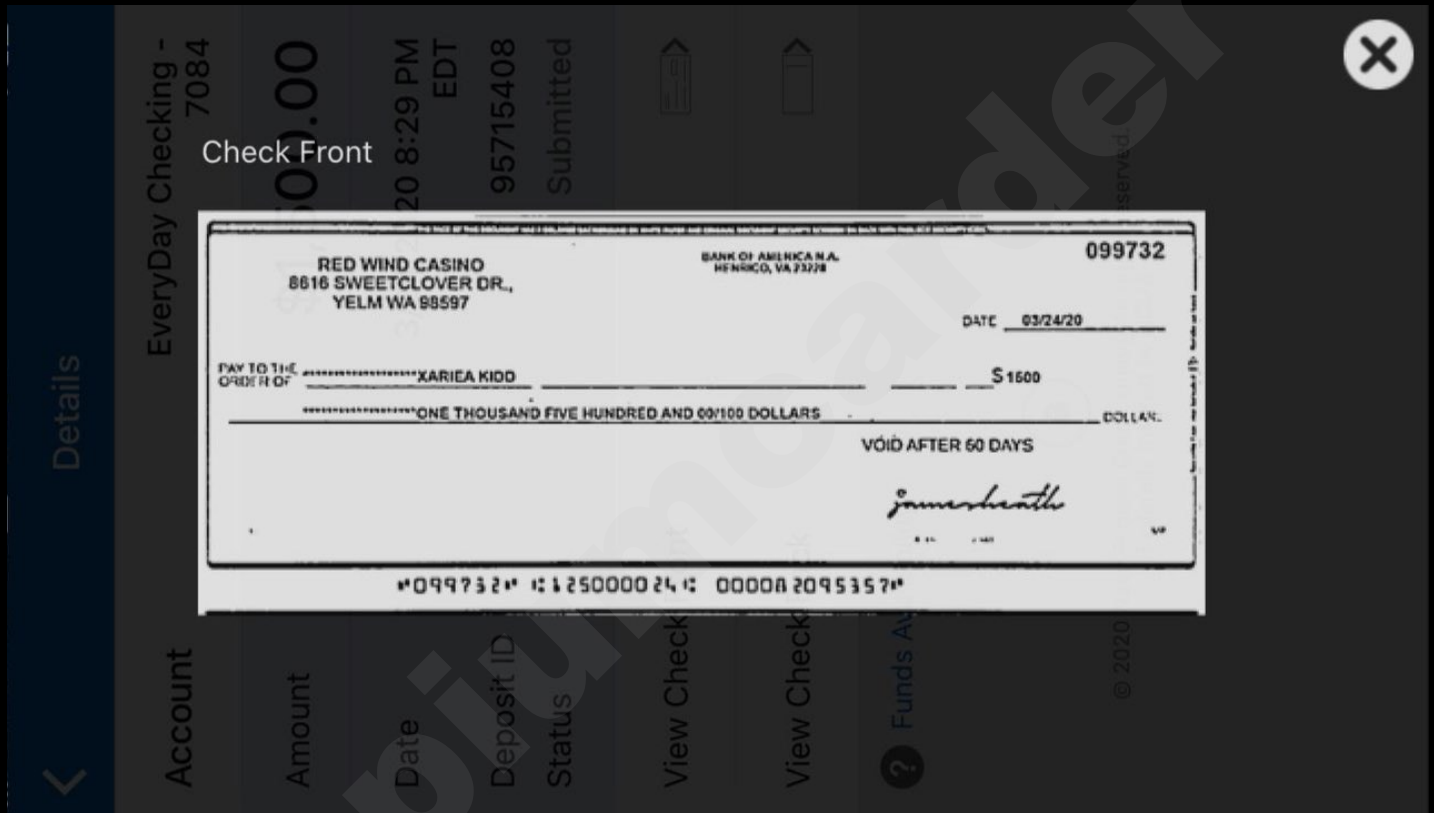

Place it on a black background, for me I use photoshop..

Windows 10,11 gang you can hit edit photo and it'll put it in a black background for you Others, aunno . Get creative. But its gotta be on a black background

You'll deposit the check from your screen . Don't worry humans dont see it , the bank app just looks out for the info in their correct positions

This is an example of how the bank app sees it. It totally ignores the design and focuses on the info , As far as your info is litt all is well

That's all for if you don't have check paper.

TO PRINT THE CHECK OUT

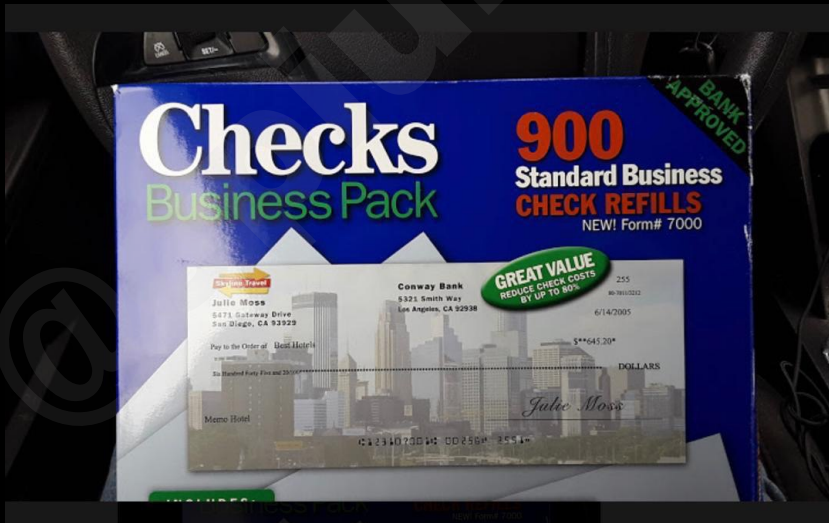

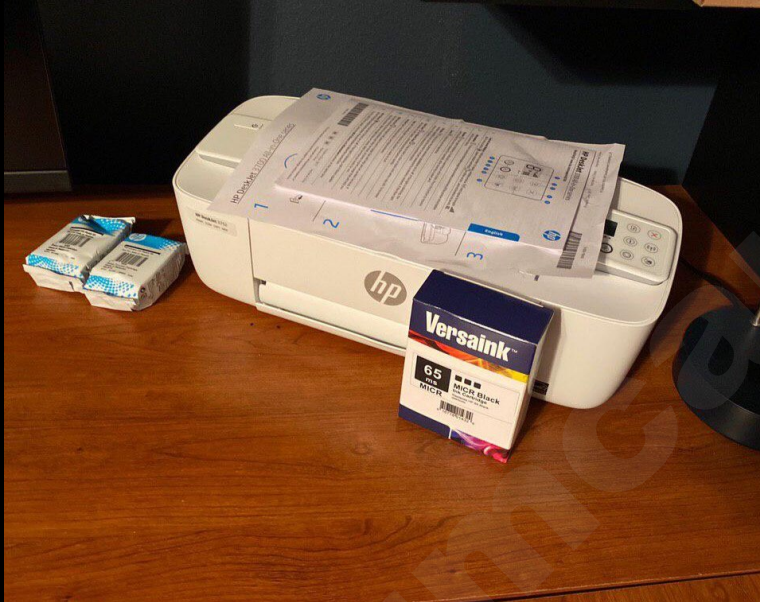

ATM DEPOSIT: Sending a physical check to your client to deposit herself using the ATM

Print this screenshot out on normal paper and place on a black background for mobile deposit. That works.. never send that to a client tho. She'll laugh and block you

To send a proper check to your client you need these:

- Micr compatible printer
- micr ink
- check paper with security features

Its at staples or any stationary shop , Will continue the tut in a bit. .. ask any questions where lost for now.

To endorse you can print it out and write it or you can use photoshop

I HAVE ALREADY COVERED COOKING CHECKS , jsu search ' CHECKS COOKUP ' on our telegram cahnnel

That's it for all the ways to cash your bank log

In case you wanna buy the Python Script that bypasses all 2FA and issues and transfers ping me on **Telegram - [@OpiumKeeper](https://t.me/OpiumKeeper)**

NEXT WE WILL CONTINUE THE SUGAR DADDY TUT PART 2 , join the Telegram channel

There are many different way to milk them will cover it in detail in the next one as this one is already getting long ;)

For the next part Join our Telegram Channel mentioned below , or scan QR in the first page of this tutorial solve a Captcha and join directly

Telegram : [@OpiumCarder](https://t.me/OpiumCarder)

Old username has been compromised
[@OpiumKeeper](https://t.me/OpiumKeeper)

(This is the new username any pending deals ping me here)

Next we will move to PART 2

And make sure you keep all our channels noted , Website and Bot , Telegram's Ban Wave is on , but we have backedup every tutorial till now

Hence New Channel will be up with all tutorials in no time incase of Banks Get the latest Invite links from the Website or Telegram Bot ;)

Join our Telegram channel for more free tutorials like this ;)
